

GRUNT NATUR

PROVIDES ANTISEPTIC TREATMENT FOR WOOD, CONCRETE, PLASTERED AND OTHER SURFACES
SATURATES THE MATERIAL DEEPLY

PURPOSES

Grunt Natur is used for cleaning and protection against mould and rot and for general disinfection and bacterial treatment. The product is suitable for applying on all types of surfaces: plaster, concrete, putties, solid and non-solid mineral bases, fibrous cement boards, gypsum, gypsum plasterboards, bricks and other construction materials, as well as woodchip boards and wooden surfaces. Grunt Natur can be used in both internal and external conditions.

MAIN ADVANTAGES

- ✓ Protects against rotting, mould, turning blue, timber-worms and other biological decomposers.
- ✓ Wood remains durable and recoatable.
- ✓ Preserves the texture and doesn't prevent the ventilation of the wood
- ✓ Ecologically safe, non-toxic, non-carcinogenic.
- ✓ Fire and explosion proof.
- ✓ Bleaches and cleans dirty surfaces.
- ✓ Combines chemically with material.
- ✓ No colour or smell.

DIRECTIONS FOR USE

Before applying Grunt Natur, always clean the surface of all dirt, dust or other contaminants. Grunt Natur may be applied with a brush or roller at the temperature above +5⁰C (with humidity under 75%). Apply 2 coats with an interval of 30–40 minutes with normalized total consumption being 100–250 g/m². Freshly applied agent should be dried at air temperature +12°C to +40°C (with humidity under 75%).

You can paint or cover the surface with other decorative materials after 24–72 hours. Climate conditions like low temperatures and/or high relative humidity can lengthen the drying time.

When using Grunt Natur for processing mineral bases, saturate the surface and let it function for 10 minutes, then wash the surface.

Do not process frozen wood! Do not mix Grunt Natur with other products!

Stir thoroughly before applying! (Bottom sediment doesn't affect the quality of the product)

SAFETY MEASURES

Keep locked up and out of the reach of children. Wear suitable protective clothing, gloves and eye/face protection. In case of contact with eyes or mouth, rinse immediately. If you feel unwell seek medical advice. Use only in well-ventilated areas. Discard with other household waste products.

COMPOSITION

0,2% DDAC substance, ferric(III)hydrophosphate, water and additives.

STORAGE AND TRANSPORTATION

Store and transport Grunt Natur in hermetically sealed original containers separately from food products. Keep at temperature above -5°C. The storing period of the product is 24 months.

Contains biocide! Please read the user manual carefully before using.
